

MALASPINA

COWICHAN CAMPUS

Grapes-Viticulture-Wine

Who Should Attend?

Horticulture professionals, grape growers, winemakers, vineyard managers, and others interested in improving their skills and service to the developing cool-coastal climate viticulture industry.

Cool-Coastal Climate Viticulture

– Short Course

This intensive five-day course introduces the viticulture skills and knowledge required to work in, or manage, a cool-coastal climate vineyard. Learn about the physiology of the vine, establishing a vineyard, pruning and trellising techniques, irrigation, pests, diseases and canopy management.

HGCV 001 F06D01

\$649

Gary Strachan, M.S.A., S.M.

5 sessions: Saturday and Sunday, November 18-26; 9am-4pm
& Monday, November 27; 9am-4pm (Field Trip)

Wine Making

Be introduced to the wine making skills and knowledge required to work in or manage a small, cool climate winery. Learn about the annual cycle of wine making, assess grape quality, recognize good wine making practices, and the fundamentals of wine cellar procedures. The role of the tasting room, wine shop and customer service will also be covered.
